

TRADE FROM CHART - HOW TO INSTALL

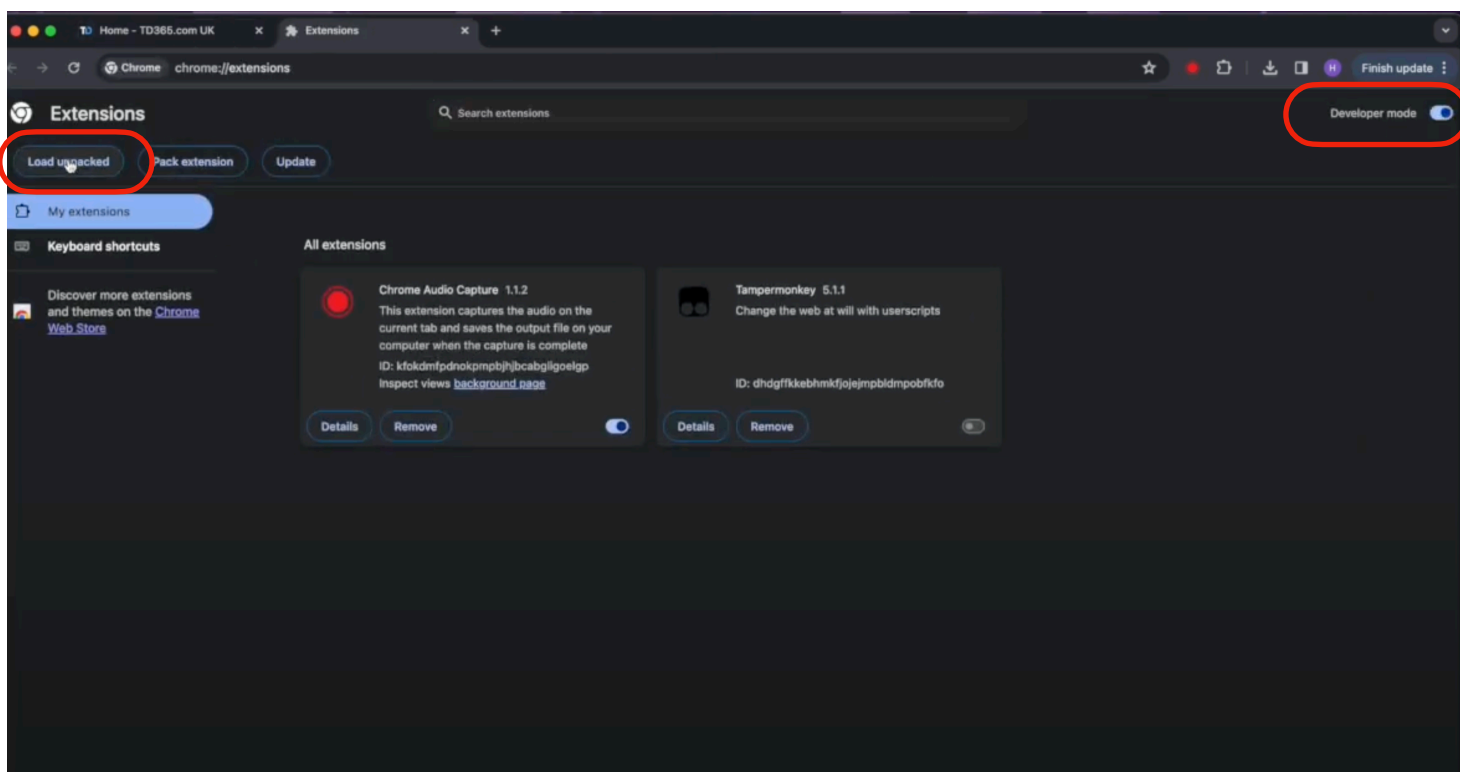

Thanks for trying our Trade From Chart software. This manual will try to walk you on how to install the software extension on your browser. Supported browsers currently include Google Chrome and Microsoft Edge. It works on both Windows, Mac and Linux (Ubuntu). This software only works on a desktop computer. Currently no Tablets and Mobile phones are supported.

1 - After you have downloaded the .zip file and unzipped in a location on your hard drive, please follow the instructions below:

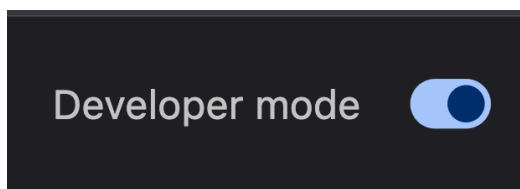

Chrome Users:

1 - Open a tab, and type <chrome://extensions>

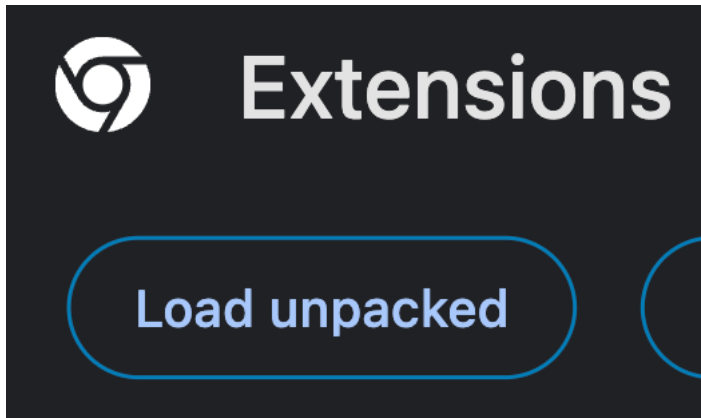

You will see the following page:

2 - Please make sure “**Developer Mode**” is checked, on the upper right of the page:

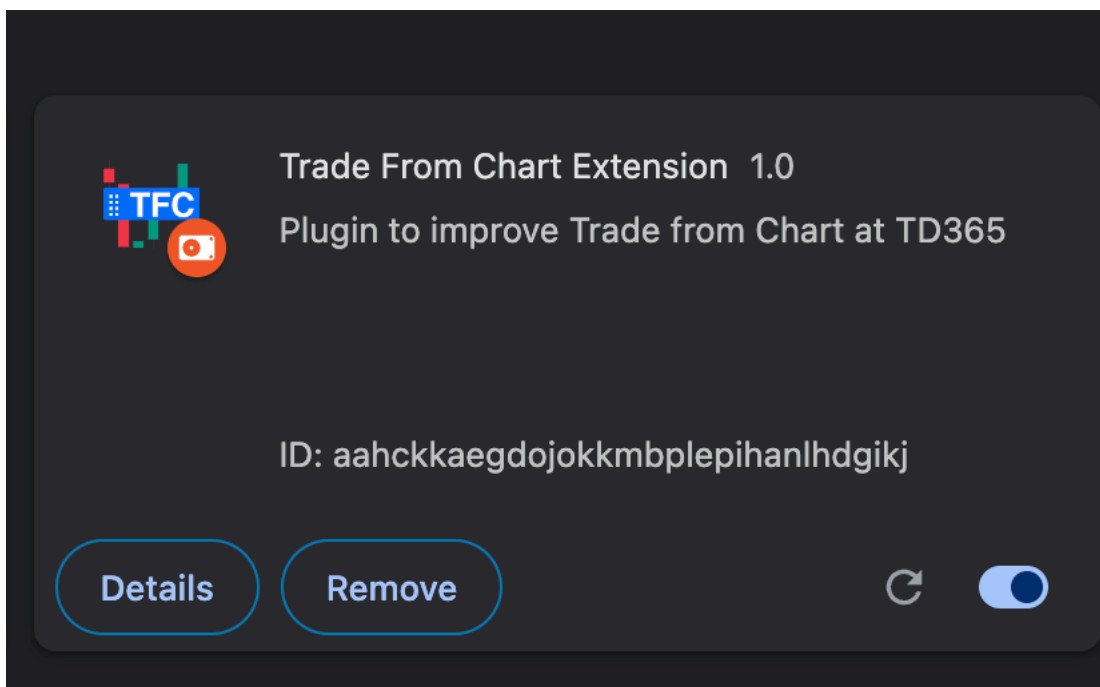

3 - On the upper left of your screen, click on “**Load Unpacked**”

4 - Now, browse to the location where you unzipped the downloaded file, and make sure you select the “**dist**” folder, and click select.

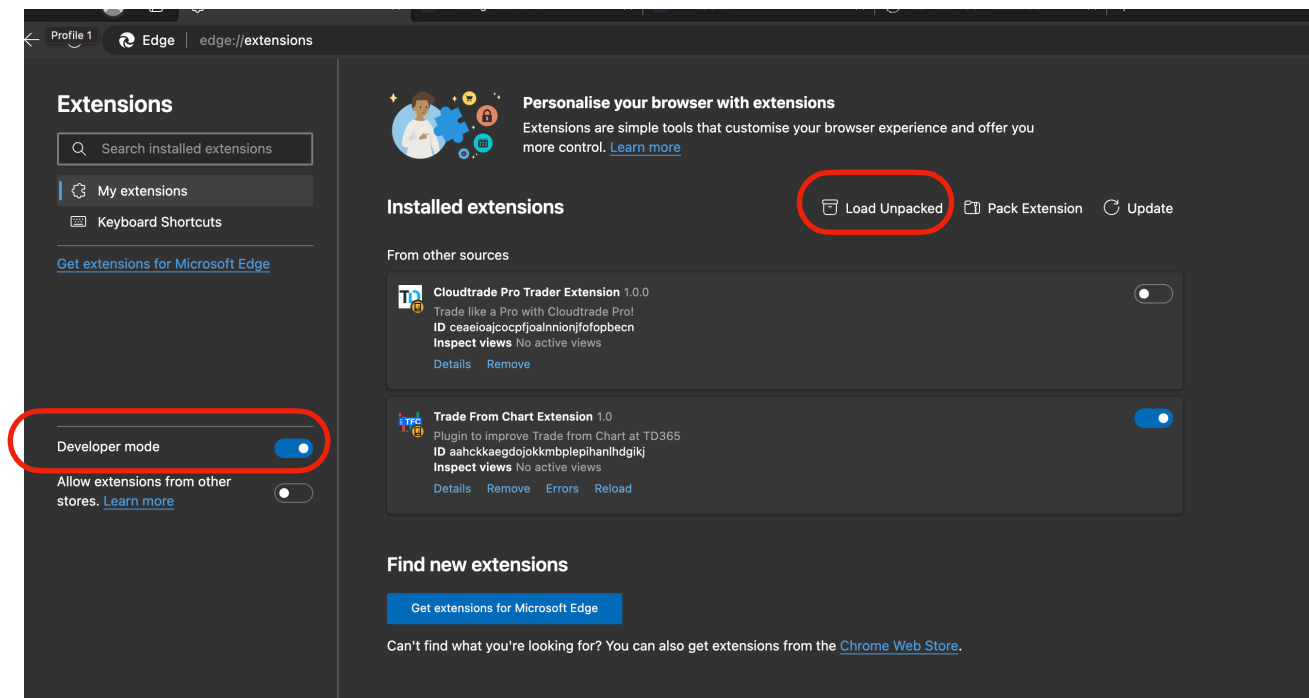

5 - You now have the extension installed on your list of installed extensions.

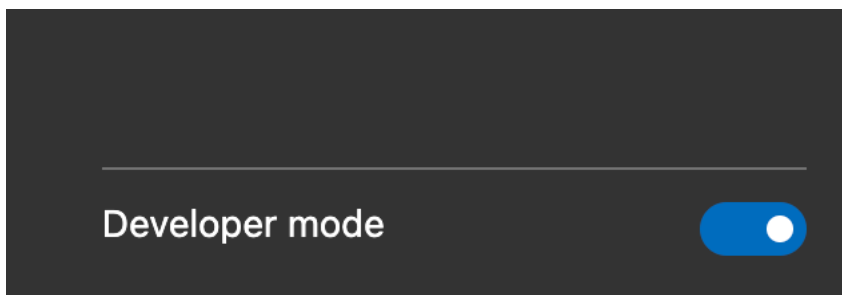

Microsoft Edge Users:

1 - Open a tab, and type `edge://extensions`

You will see the following page:

2 - Please make sure “**Developer Mode**” is checked, on the lower left section of the page:

3 - Above your list of installed extensions, click on “**Load Unpacked**”

Whenever you want to disable the software, make sure you turn off the toggle switch.

Please refer to the Manual on how to use the software.

HOW TO UPDATE / REMOVE SOFTWARE

If you want to update or remove the software, there are 2 options:

Option 1 (Update):

- Unzipping the new zip file to the same location as your previous file;
- Open a tab, and type `chrome://extensions` (Chrome) or `edge://extensions` (Edge);
- Click the **Reload** button. It should update the software to the newest version.

Option 2 (Remove or Delete):

- Delete the extension using the **Remove** button;
- Follow the steps above on how to install it again.
